Brunswick, GA 31525

Mr. Steve Johnson,

The machine was very easy to move around on the golf course with no disturbance to the turf areas, because of its light weight. The speed it moves through heavy forestation was remarkable, chopping it into very small pieces. A great piece of equipment for cleaning out areas around specimen trees, again due to its light weight. The machines design also allows it to negotiate many different types of terrain.

Sincerely,

Scot Drader
